

ZEDi-10FX combines the robustness and hands-on control of an analogue mixer with a high quality 4 x 4 USB interface and an outstanding multi-model FX unit, making it a perfect all-round choice for musicians, recording artists and venues. Whether it's bouncing ideas around at home, performing live or recording tracks to share on YouTube and Soundcloud, ZEDi-10FX is a versatile companion for every step of the creative journey.

The studio quality, 24-bit / 96kHz, 4x4 USB interface makes it easy to capture stunning multitrack recordings direct from the mixer to a Mac or PC without the need for any extra equipment. Featuring the new GSPre boutique preamp design, developed from the revered GS-R24 studio recording console, the ZED boasts exceptionally low noise and massive headroom, with a signature analogue warmth and depth. ZEDi-10FX includes a specially created suite of studio quality reverbs, delays and special multi-model FX, crafted by Allen & Heath's acclaimed in-house effects aficionados. Guitarists will be pleased to know that two of ZEDi-10FX's mono channels feature Guitar DI high impedance inputs, allowing guitars to be plugged straight into the mixer without the hassle and expense of carrying separate DI boxes.

MAIN OUTPUTS

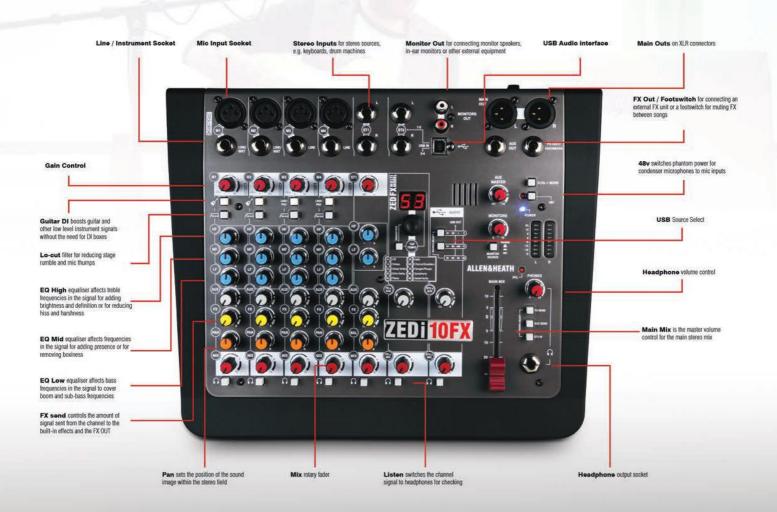

10 Channel Mixer with FX +4x4 USB Interface

# ZEDi 10FX

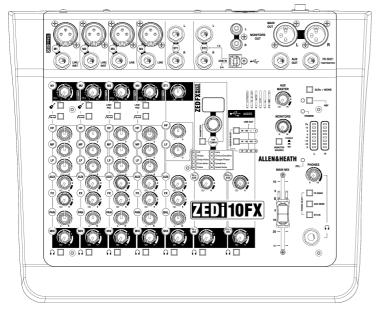

Allen & Heath Limited Kernick Industrial Estate Penryn, Cornwall, TR10 9LU, UK www.allen-heath.com

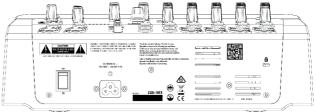

## **Technical Datasheet**

#### Overview

- 4 x Mic/Line Inputs with GS Preamps.
- Global 48V Phantom power.
- 2 x Line Pads & 2 x Switchable Hi-Z Inputs.
- 2 x Stereo Line Inputs.
- Internal FX Processing on all channels.

- 4 in, 4 out, 24-bit/96kHz USB Audio Interface.
- FX/Aux/Monitor & Headphone Outputs.
- Hi-Pass filter on microphone inputs.
- 3 Band EQ on mono channels.
- PFL select to headphone output.

## **A&E Specifications**

The mixer shall be a compact and portable analog mixer with 4 mono and 2 stereo input channels mixing to a stereo Main Mix output. The mixer shall weigh no more than 2.31kg (5.1lbs).

Each mono input channel shall have an XLR Microphone connector and Line level quarter-inch jack connector and shall be equipped with High Pass Filter and 3-band equaliser circuit

Stereo input channels shall use quarter-inch jack connectors, and shall have a fixed 2-band EQ.

All XLR Microphone inputs shall have the ability to power Condenser Microphones requiring 48 Volt Phantom Power. This shall be switchable and have a red LED to indicate activation.

There shall be two high-impedance jack inputs on mono channels, which can handle a normal line level or a low level input directly from a guitar pickup, allowing instruments such as guitars to be plugged straight into the mixer without the need for a DI box. There shall be an additional two jack inputs for normal line level signals, activated via a pad button.

XLR Mic input characteristics shall conform to a Gain Min/Max of 6dB to 60dB with a maximum Input Level of 13dBu.

Quarter-inch jack Line input characteristics shall conform to a Gain Min/Max of -14dB to 40dB with a maximum Input Level of 18dBu.

The mixer shall have on-board effects which can be independently applied to each input channel. In addition there shall be an effects out on a quarter-inch jack connector.

The mixer shall have a 4in/4out USB Audio Interface which will allow for a total channel count of ten. The audio interface shall operate at 24 bit/96kHz as standard, be class compliant for Mac and iOS devices and be compatible with Windows.

The mixer surface shall include independent rotary control for each input channels gain, level and mix. Each channel should have an individual Pan control and a [PFL] switch to route to the headphone output. An LED shall indicate when a [PFL] channel is active.

The Headphone output should use a quarter-inch jack connector with a rotary to control output level.

The L&R outputs shall have XLR connectors and will be controlled via a mix output fader. Level indication shall be via a stereo eight segment LED display.

There shall be a stereo monitor output on RCA connectors and a separate AUX output on quarter inch jack socket.

It shall have a built in power supply accepting AC mains voltages of 100~240V, 50/60 Hz, 12W max via an earthed 3-pin IEC C6 male connector mounted on the rear chassis.

A switch shall be provided near the mains inlet to isolate the mixer from the incoming mains supply.

Recommended operating temperature for the mixer shall be 0 to 35 degrees Celsius.

The unit shall be the Allen & Heath ZEDi-10FX.
